- Developed and sold digital menu platforms for restaurants, streamlining ordering workflows

Phoenixopia Solution PLC Jun 2025 – Aug 2025 · Addis Ababa

Backend Developer

- Developed full-stack features for a restaurant management SaaS and third-party payment solution
- Built and integrated secure APIs, handled authentication and data flow across systems

Tripways Software Company Jun 2024 – Feb 2025 · Addis Ababa

Mobile App Developer Intern

- Contributed to a hiking & travel platform connecting users with organizations across Ethiopia
- Implemented booking flows, user interactions, and data handling for a smooth mobile experience

FEATURED PROJECTS

MenuFlow — Digital Restaurant Platform Next.js · NestJS · PostgreSQL · Socket.IO

- Built a full-stack QR-based ordering system allowing customers to place orders without downloading an app
- Developed real-time waiter dashboards with WebSocket-powered order notifications and shift management

AASTU Campus Event Management System NestJS · Next.js · AI · AWS EC2

- Designed an AI-powered recommendation engine delivering personalized event suggestions based on user interests
- Implemented QR-based attendance verification, digital ticketing, and real-time notifications

CosmicBites — Food Delivery Aggregator Microservices · RabbitMQ · Redis · Docker

- Architected a production-grade microservices platform with independently deployable services
- Integrated event-driven communication via RabbitMQ and real-time delivery updates via WebSockets

HikeHub — Mobile Hiking & Adventure Platform Flutter · Firebase · Payment Integration

- Built a mobile app connecting hikers with organizations across Ethiopia — live on Google Play Store
- Implemented trip discovery, booking flows, real-time chat, and payment integration
